IBM Watson IoT Platform

The screenshot displays the IBM Watson IoT Platform interface. The main heading is "Browse Devices". Below it, there are two tabs: "All Devices" (selected) and "Diagnose". A descriptive text states: "This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API." Below this text is a search bar labeled "Search by Device ID". To the right of the search bar is a "Device Simulator" toggle switch, which is currently turned on. Below the search bar is a table with the following columns: "Device ID", "Status", "Device Type", "Class ID", "Date Added", and "Descriptive Location". The table contains one row with the following data: "12345", "Disconnected", "NodeMCU", "Device", "Oct 30, 2022 6:37 PM", and an empty location field. Below the table, there is a pagination bar showing "Items per page 50" and "1-1 of 1 item". At the bottom right of the page, there is a status bar that says "0 Simulations running".

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
12345	Disconnected	NodeMCU	Device	Oct 30, 2022 6:37 PM
